NEWSLETTER MARCH 2023

Celebrating International Women’s Day

Women are central to the development of our collective future, not just in terms of their gender but also in terms of their voices and insights. Women bring unique perspectives and skills to the table, which are crucial for driving innovation and progress.

Did you miss any of all the great lectures, discussions. Join us at Digital Futures hub and learn from research presentations on 18-19 October! Stay tuned for more information...

Open Calls

Digital Futures Open Research Days on 20-21 April

The aim of our Open Research Days is to share our research with the public, and to create a platform for dialogue and collaboration. The program will feature presentations, discussions, and poster sessions. The event is open to everyone interested in digital technologies and their impact on society.

HURRY UP and REGISTER for Digitalize in Sthlm 2023 on 18-19 October! Stay tuned for more information...

International Women’s Day. At Digital Futures, we have a number of excellent female researchers, and Chantal Mutimukwe aims to provide a comprehensive understanding of privacy issues around the human being.

Chantal Mutimukwe: Privacy is also about power, and dignity, which is lost when someone has too much control over personal information.

Co-sponsored events & seminars

Women Reclaiming the City – Urbanism, Architecture, and International Research on Women Reclaiming the City – Planning

Women Reclaiming the City – Urbanism, Architecture, and International Research on Women Reclaiming the City – Planning

The Women Reclaiming the City seminar series is aimed at raising awareness of the role of women in urban planning, and at promoting equal opportunities for women in the field.

Open Workshops

Digital Futures Hub, Osquars Intressen 12

Digital Futures Hub is a meeting place for researchers and practitioners interested in digital technologies. The hub offers a range of workshops, seminars, and networking events. The next event will take place on 20-21 April. More information here...
